Subject: **LIRR Emergency Backup Power at the Penn Station Radio Room**

Dear Mr. Rheem:

I am writing this letter to express my thanks to you, Gene Rose and Conley Equipment Company for your professionalism and the service that was extended to the Long Island Rail Road while we worked together in installing the emergency backup power system in the Penn Station Radio Room earlier this year.

During the recent blackout that affected a major portion of the Northeast United States all the power sensitive equipment that was backed up by the equipment that your company supplied held up without a glitch. This ensured, among other things, that the Police in Penn Station were able to maintain radio communications during this difficult time.

It was a pleasure working with you and Gene and I look forward to doing business together in the future.

Sincerely,

A handwritten signature in blue ink that reads "Paul Brady".

Paul Brady, PE
Communication Systems Engineer
